Year End	\$1.35	\$1.37	\$1.32	\$1.28	\$1.35
Average	\$1.38	\$1.29	\$1.28	\$1.33	\$1.30

Cost Income Ratio has been calculated using total costs (excluding impairment) /total income.

NPL Ratio is calculated as gross non-performing loans/loans to banks and customers (excluding bank placements).

CHAIRMAN'S STATEMENT

Opening Remarks

It is my pleasure to present the 2021 financial report for Union Bank UK. This report details the Bank's performance in the year and notes the challenging operating environment.

Share and Purchase agreement

In January 2020, in order to streamline its business operations and focus on growth opportunities in Nigeria, Union Bank of Nigeria (UBN) announced its proposed divestment of its entire equity stake in UBUK, and entered into a share Sale and Purchase agreement ('SPA') with a preferred bidder. For the whole of 2020, the Bank continued to serve its current customers, whilst preparing for a new strategic direction upon completion of the sale process.

In April 2021 the SPA process was terminated without a sale having been concluded with the preferred bidder. UBN continue to seek a buyer for UBUK and so the Board and management of UBUK continue to operate UBUK as a going concern. Whilst this process continues, UBUK remains committed to serving its current customers and operating as a leading provider of specialised financial services to target clients with interests in the UK and Africa.

2021 Financial Performance

Our performance in 2021 reflects a period of transition: although the sale process did not conclude, the Bank operated within a transitional phase for almost the entire of 2021. In particular, during 2021, the Bank was cautious in its use of liquidity whilst the sale process was ongoing. The fall in gross earnings of 44% to \$4.4m (2020: \$7.9m) reflects lower business volumes combined with lower interest rates. We remained disciplined with our costs base, with costs only increasing by 2% to \$10.5m (2020: \$10.2m). Pre-tax losses before impairment were \$6.51m (2020: loss \$3.93m) which is a result of a reduction in our loan portfolio; itself reflective of the desire to maintain high liquidity levels during the sale process.

The Bank has continued to demonstrate its resilience and adaptability throughout 2021, with the Bank having adopted hybrid working between working from home and working from the office when UK Covid restrictions have allowed. I am pleased that the Bank has been able maintain both customer service levels and a robust control environment throughout this enforced change.

2022 Outlook

The Covid-19 pandemic has hugely affected global welfare, economies and on the markets in which the Bank operates. The operations of some of the Bank's borrowers have been affected by the pandemic, in particular the secondary effect of unavailability of foreign currency within Nigeria. However, the Bank's loan book is well collateralised, and the Bank does not expect to suffer financial losses due to this situation. The vaccination programmes currently being undertaken, however, particularly in the UK, offer optimism about the future.

The Bank remains committed to serving its current customers and target market whilst UBN concludes its divestment process.

Finally, I would like to express my appreciation to all our external stakeholders, including our customers, investors and partners, for their sustained confidence in and loyalty towards the Bank. My appreciation also extends to all our employees, for their critical role in adapting to 2021's challenges and realising the bank's corporate aspirations.

Thank you.

STRATEGIC REPORT

Overview

Union Bank UK's ('UBUK' or 'the Bank') strategic aim throughout 2021 was to primarily serve as an extension of Union Bank of Nigeria in the UK, serving and partnering with our clients on their specialised financial needs revolving around regional and international trade. Our focus continues to be building our core business segments of Retail, Treasury/Corporate and Commercial both vertically, by offering a competitive range of products, and horizontally so that our customers recognise UBUK for all their banking needs.

Performance

The Bank's performance in 2021 reflected lower business volumes as the Bank cautiously managed its liquidity whilst ensconced in the sale process, combined with lower interest rates. This produced a pre-tax loss of US\$5.97m against the previous year loss of US\$16.51m.

Interest income at US\$3.1m is down on the 2020 figure of US\$6.2m. Dealing and exchange gains at US\$0.1m were down on the previous year figure of US\$0.3m. Fee and commission income at US\$1.2m were down on the previous year of US\$1.4m.

Costs were again maintained within budget for the year while impairment charges amounted to US\$nil against the previous year of US\$12.6m.

Position

Total assets of the Bank decreased from \$288m at 31 December 2020 to \$171m at 31 December 2021. The majority of the Bank's assets were loans and advances to banks, being \$111m at 31 December 2021 (\$234m at 31 December 2020).

Loans and advances to customers increased from \$14m at 31 December 2020 to \$16m at 31 December 2021, as the Bank took additional UK commercial lending opportunities whilst still maintaining a cautious approach to liquidity, whereas cash and cash equivalents increased from \$8m at 31 December 2020 to \$9m at 31 December 2021.

The overall decrease in assets was driven by the decrease in the Bank's liabilities. In Q1 2021, the Central Bank of Nigeria withdrew its deposits at the bank (\$131m at December 2021) in anticipation of the sale of the bank to a non-Nigerian shareholder. This was partially offset by an increase in cash collateral received for Letters of Credit. The net result of this was that deposits by banks decreased to \$69m at 31 December 2021 from \$152m at 31 December 2020.

Kev Performance Indicators

The key indicators of the Bank's performance monitored by the Board are those relating to profitability as measured by the pre-tax return on equity (ROE) and Capital over risk weighted assets.

In the 12 months to 31 December 2021, the Bank's losses on equity was 14.6% (2020: loss of 35.3%) and capital over risk weighted assets was 40% (2020: 36%). The key indicator of efficiency monitored by the Board is the cost/income ratio which moved to 265% from 163% in 2020 reflecting the reduction in income noted above.

The Bank recognises that the movement in Sterling/US\$ rates could impact on its costs and it would take appropriate steps if there is a significant negative movement. The Bank's results are shown in the statement of comprehensive income on page 22, with the impact on shareholders' funds shown in the statement of changes in equity on page 24.

We recognise our Corporate Responsibility and are committed to ensuring our business practices have a positive effect on our staff, clients and society as a whole. We achieve this through adhering to key corporate objectives and values of a high standard which are set and pursued in the context of the current social and regulatory environment. We know that sustainable business success depends on the engagement of our people and with our community. The Bank has developed a Climate Risk Strategy that meets the PRA's Supervisory Statement on 'Managing the Financial Risks from Climate Change' during the year, led by the Chief Risk Officer ("SMF 4"). This includes:

- A *Climate Risk Policy*, which follows the 5 Pillars approach of our Enterprise Wide Risk Framework, and includes a mission statement setting out the Bank's overarching commitment and approach to climate risk.
- A *Climate Risk Framework* which sets out the Banks approach and practical application of the Climate Policy and provide a means for assessing the risks on particular business activities as relevant to the scope of our business and client base.
- A *Climate Change Risk Assessment* in relation to Nigeria assessing the short, medium and long-term risks of climate change.
- Working with a leading specialist the Bank is using science-based carbon accounting to develop a *Climate Risk Assessment* to benchmark our own operations and CO2 emissions.

STRATEGIC REPORT

CONTINUED

Following the future sale of UBUK and the formation of a new Board, the Climate Strategy will be reassessed in relation to the new strategic direction and business opportunities, at which time they will be re-presented to the new Board for adoption.

Future Prospects

As noted in the Chairman's statement, UBN continue to seek a buyer for UBUK.

The Bank remains committed to serving its current customers and target market whilst a buyer is found, and will continue to be a leading provider of specialised financial services to target clients with interests in the UK, Europe and Africa.

Risk Management

The Board of Directors is ultimately responsible for risk management policies, limits and risk appetite. It is supported by two of its standing Committees, the Board Risk Committee and Board Audit & Compliance Committee that assist in formulating policy and provide strategic direction for all aspects of risk management. These Committees, in turn, charge management to develop, update and implement these policies, controls and limits with risk management ensuring that there is no event or combination of events that will materially affect the stability of the Bank.

Management operates through a number of committees, namely The Asset and Liability Committee ('ALCO'), Management Risk Committee, Credit Committee and Management Committee, each having its own terms of reference.

All credit decisions and new products require the approval of one or more committees depending on the amount required and are initially reviewed and recommended by the Risk Department before submission to the relevant committee for approval. Risk will monitor the credit until drawdown to ensure all conditions precedent are met. All portfolios and limits are continuously monitored by senior management via the monthly Management Risk Committee.

Principal Risks and Uncertainties

The principal risks associated with the business of the Bank are credit risk, liquidity risk, market interest rate risk and operational risk. The Bank has established a comprehensive enterprise risk management framework to manage these risks, guided by the Basel Committee's principles for sound risk management and compliance with Basel III and FCA and PRA prudential regulations, including those in respect of liquidity risk.

Section 172(1) statement

The sale process continues to have the biggest impact on the Bank's stakeholders in 2021, as noted in the Chairman's statement.

The employees are the Bank's most valuable asset, as recognised by the Directors in the "Employee Matters" section of the Directors' Report. As UK government Covid restrictions were relaxed, staff engagement was undertaken to understand employees' wishes regarding the balance of working from home and the office, which were given due priority when new working practices were developed.

Maintaining the Bank's reputation with Regulators and other stakeholders continues to be of paramount importance to the Bank. The Bank will continue to undertake its business adhering to the highest standards of conduct and culture, as detailed in the "Corporate Culture and Values" section of the Directors' report. We will keep all stakeholders fully informed and hold regular dialogue with the Regulator.

As already highlighted in this Directors' Report the Bank has a clearly defined process for risk identification, assessment and mitigation and has identified those reputational risks associated with the sale and ensured mitigants are in place.

STRATEGIC REPORT

CONTINUED

Covid-19 pandemic

The impact of Covid-19 on the Bank has been seen in different ways in different locations. In the UK, government action has been frequent and resulted in significant changes to the operations of the Bank. In Africa, less stringent rules have been enforced, but the availability of US Dollars has declined.

Although the development and approval of vaccines, and the rollout of the vaccination programme in the UK, gives rise to optimism for 2022, this matter is under constant review by the Board and Senior Management. The primary concern of the Bank is the health and welfare of its staff and customers.

The Bank has a fully tested remote working capability which is secure and access is only possible through bank issued equipment. Systems for oversight and surveillance will continue to operate. Processes that require pre or post authorization or approval have continued to operate, and electronic signatures are being used as necessary. This allows the Bank to safely operate a hybrid model of working from home and the office.

The Bank's customers are primarily Nigerians based in Nigeria. These customers have been advised of changes to our services and have been kept up to date of developments through the bank website. Where customers have experienced short term economic difficulties, we have worked closely with them to provide a suitable solution.

We have carried out a full Covid-19 risk assessment looking at all aspects of risk. Our liquidity and capital positions will remain adequate.

Management will continue to closely follow the global health and economic situation with an emphasis on Nigeria via the ALCO and evaluate the possible short and long term impact on our portfolios. In addition, the Bank makes an assessment with regard to current and prospective regulatory developments and their likely impact on the Bank's capital and liquidity requirements, and the Bank's approach to the management of its other key risks, as well as current budgets and financial forecasts for profitability, capital and liquidity requirements including under possible future business models. The Bank is satisfied that as a result of these assessments and its prudent approach to risk management, there would be no unexpected negative impact from these factors.

Approved by the Board of directors and signed on behalf of the Board.

D J Forster

David Forster

Managing Director / Chief Executive

13 April 2022

The directors have pleasure in presenting their report together with the audited financial statements for the year ended 31 December 2021.

Principal Activities

Union Bank UK plc ('UBUK' or the 'Bank') was incorporated in England and Wales on 10th February 2003 as a wholly owned subsidiary of the Union Bank of Nigeria Plc ('UBN').

The Bank is authorised under the Financial Services and Markets Act 2000 (FSMA 2000), to carry on regulated financial services activities, including deposit-taking and dealing in investments as principal. The business of the Bank includes the provision of retail and commercial banking, treasury and trade finance services.

The Bank has established and maintains the management structure, policies, systems and procedures necessary to enable full compliance with the rules and regulations of the Financial Conduct Authority ('FCA') and the Prudential Regulation Authority ('PRA').

Directors

The directors of the Bank at the date of this report and those who served during the year ended 31 December 2021, are as follows:

Mr GC Laws - Non-executive Chairman

Mr E Okonkwo - Non-Executive

Mr DJ Forster - Managing Director/Chief Executive

Mr KS Kasongo - Non-executive
Mr NJ Richards - Non-executive

Emeka Emuwa - Non-executive (resigned 23 December 2021)

Suzanne Iroche - Non-executive (resigned 5th May 2021)

Going Concern Basis of Preparation

The financial statements are prepared on a going concern basis.

In keeping with the guidance issued by the Financial Reporting Council, the Board has considered formally whether it is appropriate to prepare the financial statements on a going concern basis and has concluded that the Bank has sufficient liquidity and capital to continue to trade for at least two years from the date of signing these accounts.

The Board does recognise, however, that the Bank is likely to require refinancing at some point in the future. This was expected to be provided following conclusion of the SPA process in 2021, but in April 2021 the SPA process was terminated without a sale having been concluded with the preferred bidder. UBN continue to seek a buyer for UBUK, though when refinancing is considered by the shareholders, it is expected that the closure of the Bank through a solvent wind down is one option that will be included within the decision-making process.

Due to the lack of clear refinancing strategy the Board consider that there is a material uncertainty that may cast significant doubt on the company's ability to continue as a going concern.

Financial Results

The Bank's financial statements are prepared in accordance with UK adopted international accounting standards in conformity with the requirements of the Companies Act 2006. The functional currency of the Bank for financial reporting purposes is the US Dollar (US\$), being the currency in which the majority of its assets, liabilities, capital and revenues are denominated.

The financial statements for the year ended 31 December 2021 are shown on pages 22 to 60. The loss for the year after taxation amounted to US\$ 5,966,124 (2020: US\$ 16,505,650 loss).

The directors do not propose a dividend for the year ended 31 December 2021 (2020: US\$nil).

CONTINUED

Financial Risk Management

The principal risks associated with the business of the Bank are highlighted in the Strategic Report but are credit risk, liquidity risk, market interest rate risk and operational risk.

The Bank has established a comprehensive enterprise risk management framework to manage these risks, guided by the Basel Committee's principles for sound risk management and compliance with Basel III and FCA and PRA prudential regulations, including those in respect of liquidity risk. The Board establishes the risk governance structure and sets the overall risk appetite for both risks to the capital and the liquidity position of the Bank, together with key risk management policies, including limits relating to credit, market and liquidity risks. The framework provides for independent oversight of business units, risk identification, assessment and measurement, as well as stress testing of key risks and various other risk mitigations and monitoring techniques.

Financial and other risks are assessed and documented as part of the Bank's Internal Capital Adequacy Assessment Process ('ICAAP') whereby 'treated risk' after mitigation is considered and internal capital allocated accordingly. The assessment of risks and allocation of capital recognises the Bank's commitment to the Nigerian and African markets. These include political, infrastructure and concentration risks, including dependence on industry sectors such as oil and gas. These risks are significantly mitigated by virtue of the specialised knowledge and experience of the Bank and UBN, which permits the taking of informed decisions as to risk assumption and mitigation.

The Bank has a clearly defined risk appetite including policies for the identification of key risks and also has in place Credit Grading and Key Risk Indicator tools.

The Bank also prepares an Internal Liquidity Adequacy Assessment ('ILAA'). The framework is designed to assess whether the Bank is able to survive liquidity stresses of varying magnitude and duration, including the provision to build up a liquidity asset buffer ('LAB') of UK Government or similar quality securities to be used in a liquidity stress event. In addition to this, the Bank maintains, at all times, positive liquidity ratios which are measured and monitored on a daily basis. Further information concerning the Bank's policies for managing risks associated with financial assets and liabilities is set out in note 30 to the financial statements.

Operational risk is monitored via Risk Incident Reporting from which Key Risk Indicators are generated which are aligned with the Bank's appetite statement and further supplemented by a Key Control Self-Assessment process.

The Bank has also completed a Recovery plan. The process includes identifying events and triggers thereto which would force the Bank to need to recover from an actual or imminent failure of all or part of its business and agreeing, in consultation with the twin regulatory authorities, the critical economic functions undertaken by the Bank for which a Resolution Pack will be put in place to be used by those authorities or their appointed agents.

Developments in Financial Regulation

The Bank continues to monitor developments in relation to Basel III. In addition to traditional capital requirements, banks are required to build up Capital Requirements Directive IV ('CRDIV') buffers, Capital Conservation and Counter Cyclical Buffer ('CCyB').

In March 2020, the Bank of England's Financial Policy Committee ('FPC') issued a statement announcing that the CCyB rate for UK exposures be decreased to 0.0% with immediate effect. This decrease is expected to remain in effect until at least the end of 2022, based on the record of the Bank of England's Financial Policy Committee in October 2021.

The PRA announced in December 2021 that the current nominal Pillar2A nominal amount, set by the PRA in response to the economic shock from Covid-19, will be replaced with a variable amount (with the exception of some fixed add-ons, such as pension risk) of risk weighted assets in 2022.

CONTINUED

Developments in Financial Regulation (continued)

On Friday 9 July 2021 the PRA published PS17/21 'Implementation of Basel standards' setting out its rules for the implementation of international standards through a new PRA Capital Requirements Regulations (CRR) rule instrument 8. As part of this, certain provisions in the CRR, and CRR Level 2 Regulations (referred to as 'CRR restatement provisions') are not changing materially but are being transferred into PRA rules and will become applicable on Saturday 1st January 2022.

The Bank continues to maintain HQLA 10% above the regulatory minimum in order to maintain the Pillar 1 Liquidity Coverage Ratio at required levels. From 1st January 2022 the Net Stable Funding Ratio will be added to liquidity Pillar 1 standard. The European Banking Authority ('EBA') introduced Common Reporting Standards in 2014. These standards are being replaced with the PRA Capital Requirements Regulation from 01 January 2022. The Bank continues to report the data items set to its reporting portfolio to Prudential Regulation Authority UK ('PRA').

Future Developments

The Bank remains committed to serving its current customers and target market whilst UBN seeks a new buyer of the Bank.

Replacement of the LIBOR benchmark

In April 2017, the regulatory body reviewing LIBOR; the Risk Free Rate Working Group recommended that LIBOR should no longer be used as a market reference rate. Historically, the Bank has used LIBOR to hedge the risks associated with having medium to long term fixed rate instruments on its balance sheet.

Following the cessation of LIBOR the Bank no longer prices any transactions using Libor.

The Bank is a junior member of two syndicated transactions with Libor-linked pricing. The Bank's exposure totalled \$10.4m at 31 December 2021. The facility agreements provide for options of alternative pricing benchmark in their various loan documentations in the absence of Libor.

Corporate Culture & Values

The UBN Group has, at its heart, the corporate values of Initiative, Customer Focus, Accountability, Respect and Efficiency. These values are the foundation of our dealings with our customers, and each other, and are regularly reviewed by the Board and staff to ensure that we have a working culture that sustains our position as a highly respected provider of quality banking services. The Bank promotes compliance with the "spirit" as well as the "rule" of regulation, and that all risks should be fully identified, assessed and understood before they are incurred. The Bank operates a "Three Lines of Defence" business model, to promote effective and controlled risk taking.

Information Management

The Bank seeks to ensure that expenditure on IT and Communications remains appropriate to meet all regulatory and business needs.

The Bank recognises the importance of safeguarding client data and has developed policies and physical and logical access controls which, coupled with staff awareness training, are designed to protect against data loss.

CONTINUED

Employee Matters

The Bank recognises that its performance is dependent on the quality of its work force and the investment it makes in training and development. It is the Bank's policy that its staff should have the opportunity to develop to their full potential, promote its business in a manner consistent with the highest standards and recognise its environmental and other responsibilities as a corporate citizen. Staff competencies, training and development are planned consistently with corporate objectives, including the management of risk, and staff are appraised and rewarded accordingly.

Business relationships

The biggest impact on the Bank's business relationships during 2021, including suppliers, customers and others, was operating whilst being available for sale, as noted in the Chairman's statement.

As UBN advances its divestment process, the Bank will continue to build on its strengths in international markets and maintain and leverage relationships with the Bank's existing partners to improve product and service delivery.

Property and Equipment, Intangible Assets

Changes in property and equipment and intangible assets are set out in notes 21 and 22 to the financial statements.

Covid-19 Risk Assessment

As stated in the Strategic Report the Bank recognises, and has assessed, the potential for impact upon its business as a result of the Covid-19 pandemic. This matter is under constant review the by the Directors and Senior Management.

Climate and energy considerations

Over the financial year to 31st December 2021 the Bank used 79,540 KWh which is 79.5 MWh of energy. This represents the aggregate of (a) the annual quantity of energy consumed from activities for which the Bank is responsible; and (b) the annual quantity of energy consumed resulting from the purchase of electricity by the company for its own use. The Bank consumed no energy for the purposes of transport.

With the help of the Bank's landlord all the energy purchased and consumed by the Bank during the year was provided by the Dark Green energy provider- Ecotricity. Ecotricity are Britain's greenest energy company. All of their electricity is certified green, 100% renewable and also certified vegan. Their gas is a mix of carbon-neutralised natural gas and sustainable green gas. The company have no shareholders, so, instead of paying dividends they invest all bill revenues in building new forms of green energy.

As a result of using 100% renewable energy sources our emissions for the year were zero. Had we not switched, then using the electricity emission factor reported by Defra 2020 and as calculated by Normative (the provider of our emissions calculation engine), the result would have been 17.7 tonnes of Co2eq.

UBUK have contracted to use Normative for our emissions impact calculation. Normative deliver actionable sustainability intelligence to reduce companies' emissions and calculate 100% of our climate footprint — scope 1, 2 and 3 emissions, following the Greenhouse Gas Protocol (GHGP). This will help highlight our emission hotspots and provide suggests initiatives with the greatest climate impact which will be disclosed in subsequent climate reports.

DIRECTORS' REPORTCONTINUED

Directors' Representation

The directors who held office at the date of approval of this Directors' Report confirm that, so far as they are each aware, there is no relevant audit information of which the Bank's auditor is unaware; and each of the directors has taken all the steps that they ought to have taken as a director to make themselves aware of any relevant audit information and to establish that the Bank's auditor is aware of that information.

Auditors

The Board approved BDO's reappointment.

By order of the Board on 13 April 2022.

D J Forster

David Forster Managing Director / Chief Executive 1 King's Arms Yard London, EC2R 7AF

DIRECTORS' RESPONSIBILITIES AND CORPORATE GOVERNANCE Statement of Directors' Responsibilities in respect of the Strategic Report and Directors' Report and the Financial Statements

The directors are responsible for preparing the Strategic Report and the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. The Banks's financial statements are prepared in accordance with UK adopted international accounting standards in conformity with the requirements of the Companies Act 2006.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with UK adopted international accounting standards in conformity with the requirements of the Companies Act 2006; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

Website Publication

The Directors are responsible for ensuring the Directors' Report and financial statements are made available on a website. Financial statements are published on the Company's website in accordance with legislation in the United Kingdom governing the preparation and dissemination of financial statements, which may vary from legislation in other jurisdictions. The maintenance and integrity of the Company's website is the responsibility of the Directors. The Directors' responsibility also extends to the ongoing integrity of the financial statements contained therein.

Corporate Governance

The Board of Directors of the Bank comprises one executive director, two non-executive directors appointed by UBN, and two independent non-executive directors one, of whom is the chairman of the Board.

The Board meets at least quarterly and has defined responsibilities for the overall direction, supervision and control of the Bank, including assessment of the Bank's competitive position, approval of strategic and financial plans and review of performance and financial status. It reviews and approves significant changes in the Bank's structure and organisation and establishes the risk framework, overall risk appetite and key policies in relation to credit, large exposures, impairment, liquidity and operational risk. The Board also approves and monitors the Bank's policies, procedures and processes in connection with the fight against financial crime.

The Board has three standing committees: the Board Risk Committee ('BRC'), the Board Remuneration & People Committee ('BRPC') and the Board Audit & Compliance Committee ('BACC'). These standing committees are chaired by two independent directors and one non-executive director and have written terms of reference and, with the exception of the BACC, defined limits of authority. The BRC meets as often as required but at least quarterly, the BACC and the BRPC meets quarterly.

The primary function of the BRC is to consider credit proposals in excess of the limits of authority of the executive Assets & Liabilities and Credit Committees of the Bank, and to monitor compliance with the Bank's credit, large exposure, impairment, liquidity and market risk policies.

DIRECTORS' RESPONSIBILITIES AND CORPORATE GOVERNANCE CONTINUED

Corporate Governance (continued)

The BACC comprises solely non-executive directors and is chaired by a financially experienced individual. The MD/CEO, the Chief Financial Officer, the CRO, the Compliance Manager, a representative of the outsourced Internal Auditors and a representative of the external auditors shall attend meetings only at the invitation of the Committee. The primary functions of the BACC are to assist the Board in fulfilling its oversight responsibilities by monitoring and assessing the integrity of financial statements, the qualifications, independence and performance of external auditors, compliance with legal and regulatory requirements and the adequacy of systems of internal accounting and financial controls. Its assessment of the internal control environment is made by reviewing and approving the plans of Internal Audit and considering and questioning management on operational audit reports.

The BACC also approves the appointment of, and fees paid to, the external auditors for all audit and non-audit work. It is also responsible for the appointment of the outsourced Internal Auditor.

The BRPC has responsibility for considering matters related to human resource policy, including compensation arrangements. In particular, it reviews and recommends to the Board both overall compensation pools and the remuneration of executive directors and certain other members of senior management. It has responsibility also for certain matters relating to the working environment of staff and insurance arrangements.

By order of the Board on 13 April 2022.

David Forster Managing Director / Chief Executive 1 King's Arms Yard London, EC2R 7AF

Opinion on the financial statements

In our opinion the financial statements:

- give a true and fair view of the state of the Company's affairs as at 31 December 2021 and of the Company's loss for the year then ended;
- have been properly prepared in accordance with UK adopted international accounting standards; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of Union Bank UK PLC (the "Company") for the year ended 31 December 2021 which comprise the statement of comprehensive income, the statement of financial position, the statement of changes in equity, the statement of cash flows and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and UK adopted international accounting standards.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion. Our audit opinion is consistent with the additional report to the audit committee.

Independence

We were reappointed by the Members at the AGM on 5 May 2021 to audit the financial statements for the year ended 31 December 2021 and subsequent financial periods. The period of total uninterrupted engagement including retenders and reappointments is 8 years, covering the years ended 31 December 2014 to 31 December 2021.

We remain independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. The non-audit services prohibited by that standard were not provided to the Company.

Material uncertainty related to going concern

We draw attention to note 2(b) in the financial statements, which indicates that the Company is likely to require refinancing at some point in the future at which point it is expected that the closure of the Company through a solvent wind down is one option that will be included within the decision-making process. As stated in note 2(b), these events or conditions, along with the other matters as set forth in note 2(b), indicate that a material uncertainty exists that may cast significant doubt on the company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

As a result of our risk assessment we consider going concern to be a key audit matter due to the uncertainty around the medium term strategic direction of the Company.

Our evaluation of the Directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting and our response to the key audit matter included:

- We obtained and tested the forecasts prepared by the Directors by understanding the underlying assumptions used to calculate these forecasts and testing the arithmetic accuracy of these forecasts. We checked they are consistent with the current financial and strategic position of the Company;
- With the assistance of internal regulatory experts, we performed an assessment of the reasonableness of assumptions used by the Directors in their capital and liquidity forecasts (including Internal Capital Adequacy Assessment Process and Internal Liquidity Adequacy Assessment Process Reports of the Company);
- We reviewed the sensitivity analysis performed by the Company and performed our own sensitivity analysis to
 check that even in a stress scenario, the Company will meet the capital requirements and have sufficient liquidity
 buffers in place to continue operations;

- We performed a retrospective review of the prior year forecasts by comparing to current year actuals, to assess the accuracy of the forecasts;
- We reviewed correspondence with the Regulators and minutes of Board meetings, in order to ascertain whether there were other matters that may impact the Company's ability to continue as a going concern;
- We reviewed post year end information including management accounts and minutes of Board meetings up until the date of signing the financial statements in order to ascertain whether there were other matters that may impact the Company's ability to continue as a going concern; and
- We reviewed the adequacy and appropriateness of disclosures in the financial statements, regarding the going concern assessment.

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Overview

V		2021	2020
Key audit matters	Loan Loss Provisioning Going concern	V	√ ×
Materiality	\$309,000 (2020: \$236,000) b based on 0.5% Net assets)	ased on 0.75%	of Net Assets (2020:

An overview of the scope of our audit

Our audit was scoped by obtaining an understanding of the Company and its environment, including the company's system of internal control, and assessing the risks of material misstatement in the financial statements. We also addressed the risk of management override of internal controls, including assessing whether there was evidence of bias by the Directors that may have represented a risk of material misstatement.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit, and directing the efforts of the engagement team. In addition to the matter described in the Material uncertainty related to going concern section of our report, we have determined the matter below to be the key audit matter to be communicated in our report These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter

Loan loss provisioning

The year-end provision as disclosed in Note 1(e) in the financial statements is \$129k (2020: \$601k)

The principal activity of the Company is the provision of credit services to banks, corporate and individual customers. Commensurate with the activities of the Company, the total loan loss provision is material and subject to management judgement and estimation.

We consider Expected Credit Loss (ECL) to be a significant risk due to the following:

- (1) Provisioning involves estimates and judgements; the most significant are Probability of default (PDs) and the Corporate Significant increases in credit risk (SICR) triggers identified that gives rise to staging under IFRS 9 Financial Instruments;
- (2) Underlying assumptions used in the macro-economic scenarios are subject to management bias and judgement, giving rise to the potential risk of misstatement the base/worst/better case scenarios;
- (3) All of the portfolios mentioned have an element of credit risk, however given the quantum and judgements around the valuation of collateral for loans to corporate customers we consider the corporate book to be the highest risk.

How the scope of our audit addressed the key audit matter

We evaluated the appropriateness of the Company's ECL provisioning methodology. Management have provided a methodology paper covering initial recognition, classification, and subsequent measurement which we assessed against the requirements of IFRS 9.

We evaluated the selection and source of the information used by management in determining PDs, Loss given default (LGDs) and Exposure at default (EADs), by comparing a sample of the information to our own external data sources.

On a sample basis, we assessed management's estimate for individual loans' collateral valuation by obtaining and confirming the existence, rights and valuation of the collateral to supporting documents including managements external valuations, where appropriate. We assessed the objectivity, independence and competence of managements experts.

We used our internal IT specialist to review the code applied to calculate the ECL provision to check its compliance with the stated accounting policies, and to assess the accuracy of the model.

We analysed the components of the loan book and assessed the Company's processes for identification and treatment of underperforming loans, by comparison to the accounting standards and industry practices.

We evaluated and challenged the Company's determination of what constitutes a SICR with reference to accounting standards and industry practices. We tested a sample of the Company's credit review files, to determine if SICR has been applied in line with the Company's methodology.

With the support of our internal economics expert, we assessed the appropriateness of the regression models used and the macroeconomic variables, such as GDP and Corporate insolvency rates.

We assessed the reasonability of multiple economic scenarios used, including the number, weighting and probability changes, by performing sensitivity analysis.

We assessed the adequacy and appropriateness of disclosures for compliance with the accounting standards.

Key observations:

Based on our audit work performed, we consider the estimates made by management in the calculation of the ECL provision to be reasonable, and in line with the requirements of IFRS 9.

Our application of materiality

We apply the concept of materiality both in planning and performing our audit, and in evaluating the effect of misstatements. We consider materiality to be the magnitude by which misstatements, including omissions, could influence the economic decisions of reasonable users that are taken on the basis of the financial statements.

In order to reduce to an appropriately low level the probability that any misstatements exceed materiality, we use a lower materiality level, performance materiality, to determine the extent of testing needed. Importantly, misstatements below these levels will not necessarily be evaluated as immaterial as we also take account of the nature of identified misstatements, and the particular circumstances of their occurrence, when evaluating their effect on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements as a whole and performance materiality as follows:

	2021	2020	
	\$	\$	
Materiality	309,000	236,000	
Basis for determining	0.75% Net Assets	0.5% Net Assets	
materiality			
Rationale for the	Net assets was considered to be the most appropriate benchmark as the focus of		
benchmark applied	stakeholders is primarily on the statement of	financial position.	
Performance materiality	231,800	177,000	
Basis for determining performance materiality	75% of materiality, determined on the basis assessment of the overall control environmen		

Reporting threshold

We agreed with the Audit Committee that we would report to them all individual audit differences in excess of \$6,000 (2020: \$4,000). We also agreed to report differences below this threshold that, in our view, warranted reporting on qualitative grounds.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report and financial statements other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact.

We have nothing to report in this regard.

Other Companies Act 2006 reporting

Based on the responsibilities described below and our work performed during the course of the audit, we are required by the Companies Act 2006 and ISAs (UK) to report on certain opinions and matters as described below.

Strategic report and Directors' report	 In our opinion, based on the work undertaken in the course of the audit: the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and the Strategic report and the Directors' report have been prepared in accordance with applicable legal requirements. In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic report or the Directors' report.
Matters on which we are required to report by exception	 We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion: adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or the financial statements are not in agreement with the accounting records and returns; or certain disclosures of Directors' remuneration specified by law are not made; or we have not received all the information and explanations we require for our audit.

Responsibilities of Directors

As explained more fully in the Statement of Directors' Responsibilities, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Extent to which the audit was capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

We gained an understanding of the legal and regulatory framework applicable to the company and the industry in which it operates, and considered the risk of acts by the company which were contrary to applicable laws and regulations, including fraud. These included, but were not limited to, compliance with Companies Act 2006 and UK adopted international accounting standards. We also considered the company's compliance with the licence conditions and supervisory requirements of the Prudential Regulation Authority (PRA) and the Financial Conduct Authority (FCA), and relevant tax legislation.

We focused on laws and regulations non-compliance with which could give rise to a material misstatement in the company financial statements. Our procedures included:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with relevant laws and regulations discussed above;
- enquiring of management regarding their controls and processes in place to ensure compliance with respective laws and regulations;
 - reading minutes of meetings of those charged with governance and correspondence with the FCA and PRA for instances of non-compliance with laws and regulations and fraud;

We assess the susceptibility of the financial statements to material misstatement, including fraud and considered the fraud risk areas to be management override of controls and the potential for fraud to arise within accounting estimates such as the loan loss provision. Our procedures in response to these risks included:

- in addressing the risk of fraud through management override of controls, testing a sample of journal entries for appropriateness by agreeing them to supporting documentation; and
- Assessing whether the judgements made in accounting estimates are indicative of management bias. Refer to the Key Audit Matter Loan Loss Provisioning.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Our audit procedures were designed to respond to risks of material misstatement in the financial statements, recognising that the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery, misrepresentations or through collusion. There are inherent limitations in the audit procedures performed and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we are to become aware of it.

A further description of our responsibilities is available on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE FINANCIAL STATEMENTS

1. Reporting entity

Union Bank UK plc is a company incorporated in the United Kingdom under the Companies Act 2006. The address of the Company's registered office is given on page 5.

Information concerning the principal activities and operations of the Bank and its regulatory status is set out in the Directors' Report and in the notes to the financial statements.

2. Basis of presentation

(a) Statement of compliance

The financial statements of the Bank have been prepared in accordance with UK adopted international accounting standards in conformity with the requirements of the Companies Act 2006.

(b) Going concern basis of preparation

The financial statements are prepared on a going concern basis.

In keeping with the guidance issued by the Financial Reporting Council, the Board has considered formally whether it is appropriate to prepare the financial statements on a going concern basis and has concluded that the Bank has sufficient liquidity and capital to continue to trade for at least two years from the date of signing these accounts.

The Board does recognise, however, that the Bank is likely to require refinancing at some point in the future. When this is considered by the shareholders, it is expected that the closure of the Bank through a solvent wind down is one option that will be included within the decision-making process.

Due to the lack of clear refinancing strategy the Board consider that there is a material uncertainty that may cast significant doubt on the company's ability to continue as a going concern

The Bank does not expect to be materially affected by the impact of Brexit.

(c) Basis of measurement

The financial statements have been prepared on the historical cost basis, except for the revaluation of certain financial instruments as required under IFRSs.

(d) <u>Functional and presentation currency</u>

The directors are of the opinion that the functional currency of the Bank is the US Dollar (US\$), being the currency in which the majority of the assets, liabilities and revenues are denominated. Therefore, these financial statements are expressed in US\$ and all financial information is presented in US\$, rounded to the nearest thousand.

(e) <u>Use of estimates and judgement</u>

The Bank makes certain estimates and assumptions regarding the future. Estimates and judgements are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Expected Credit Loss provisioning

The Bank uses IFRS 9 Financial Instruments ('IFRS 9') guidance on the 'classification and measurement' of financial instruments, including the expected loss model for calculating 'impairment' on financial assets.

The key components of IFRS 9 which are applicable to the Bank and its financial instruments are: 'classification and measurement' and 'impairment'.

The Bank's interpretation of these requirements is detailed below in addition to how they have been implemented and continue to be monitored.

2. Basis of presentation (continued)

(e) Use of estimates and judgement (continued)

Classification and measurement

Classification of financial assets depends on how they are managed and their contractual cash flow characteristics. IFRS 9 requires that financial assets are categorised in to two broad business models: 'hold to collect' and 'hold to collect and sell'. The objective of the 'hold to collect' ('HTC') business model is to hold financial assets and collect their contractual cash flows, rather than with a view to selling the assets to generate cash flows. However, there is no requirement that financial assets are always held until their maturity. Financial assets that meet a 'Solely Payments of Principal and Interest' ('SPPI') test and are held in a HTC business model will be classified at amortised cost. Under the 'hold to collect and sell' business model, the objective is to both collect the contractual cash flows and sell the financial asset. In contrast to the 'hold to collect' business model, sales are integral rather than incidental, and consequently this business model typically involves a greater frequency and volume of sales.

Only financial assets that meet the SPPI test and are held in a 'hold to collect and sell' business model can be classified at fair value through other comprehensive income ('FVOCI').

Financial assets designated in the 'hold to collect and sell' model are initially recorded at cost and subsequently remeasured at fair value with changes recognised in other comprehensive income ('OCI') until the assets are sold. Upon disposal the cumulative gains or losses in OCI will be recognised in the income statement. At the year end, the Bank only had debt securities in this classification as detailed in note 17.

Financial assets designated in the 'hold to collect' are subsequently measured at amortised cost.

Impairment

Under IFRS 9 loan loss provisions are calculated on an expected credit loss ('ECL') basis. The ECL model incorporates a forward looking view so when a financial asset is initially recognised, an impairment loss allowance is calculated for the expected losses from defaults over the following 12 months. If the Bank then determines that there has been a significant increase in the credit risk of an asset, this impairment loss is increased to cover the expected losses over the whole life of the asset. In addition to impairment losses being required against financial assets, ECLs are also required against the value of certain off-balance sheet commitments where contracts have been entered in to on behalf of customers, but an asset has yet to be recognised on the Statement of Financial Position.

The computation of credit losses under IFRS 9 involves estimation of probabilities of default ('PD'), loss given default ('LGD'), a range of unbiased future economic scenarios, estimation of exposure at default and assessing where there have been instances of increases in credit risk.

The Bank currently estimates the 12-month and lifetime PD, LGD and exposure at default ('EAD') for each loan to estimate the ECL for its portfolio. This modelling approach forecasts PDs for the remaining contractual maturity by taking into consideration how borrower-specific and macroeconomic conditions influence their estimation. Estimates are also generated for LGDs and EADs based on the nature of the collateral held and the credit exposures as well as

incorporating credit risk mitigation activities that the Bank undertakes in its management of credit risk. The Bank has performed an assessment of the key drivers of risk in its credit exposures and is modelling multiple-economic scenarios for these.

The Bank sources external data projections to use as inputs into these computations. Most significantly, these include global and emerging markets GDP forecasts and UK Consumer Price Index forecasts (only used in calculating the ECL for mortgages, the Bank's portfolio of which is wholly UK based).

The Bank uses IMF projections for GDP as the Bank expects that the IMF's global remit and expertise meant that their emerging market, and in particular, African, projections should hold more weight than agencies that might focus more on the developed world.

(e) Use of estimates and judgement (continued)

Impairment (continued)

To ensure an unbiased calculation, the Bank considers a range of forward-looking economic scenarios when calculating the ECL:

Base – as per the calculation, based on externally sourced data inputs as described above

Better – all PDs within the base case divided by a factor of 1.5

Worse – all PDs within the base case multiplied by a factor of 1.5

A percentage is applied to each case in order to generate an unbiased ECL.

During 2021, the Bank kept constant the weightings applied to each case:

	2021	2020
Better	20%	20%
Base	50%	50%
Worse	30%	30%

Following the Covid-19 pandemic, the Bank still believes that third party projections used in the ECL model, such as IMF projections of growth rates, are more likely to not be met than be over-achieved, given the global uncertainties that exist around Covid and energy markets. As such, the Bank continues to use scenario weightings that reflect this.

The Bank has used the general approach that categorises each loan into a '3 Stage' impairment model. For credit exposures where there have not been significant increases in credit risk since initial recognition, a 12-month ECL is provided for (Stage 1). For credit exposures where there have been significant increases in credit risk, lifetime ECLs are provided for (Stages 2 and 3). The Bank assesses significant increases in credit risk using both relative quantitative and qualitative measures that are commensurate with the nature of the credit exposures at their inception and on an on-going basis.

Assets designated in the HTC model that have had no observed significant increase in credit risk will be placed into Stage 1 ('performing') and provisions measured according to the outputs of the model.

As an appropriate backstop measure, under-performing assets which have had no objective evidence of significant increases in credit risk that are 30 days past due will be moved to Stage 2 ('under-performing'). Once exposures become 90 days past due, this backstop will be used in conjunction with other qualitative criteria to determine that they are non-performing and placed into Stage 3 ('non-performing'). This objective evidence of impairment will result in a provision of EAD multiplied by LGD as the lifetime ECL.

In some circumstances, as part of the Bank's recovery process for non-performing assets, the Bank will agree to exercise "forbearance", agreeing to accept later payment of principal and interest ("re-scheduling"), or to fully restructure a loan obligation. In these circumstances, particularly where repayments are heavily postponed or "back ended", loans that were under-performing (IFRS 9 Stage 2) or non-performing (IFRS 9 Stage3) might be considered, following re-structure, to be performing again.

(e) Use of estimates and judgement (continued)

Impairment (continued)

It is the policy of UBUK, in accordance with the principles of IFRS 9 that where forbearance is exercised, there should be at least a 12 month "cure period" before any impairment allowance, generated by the previous default or arrears, is removed. During this period the customer needs to demonstrate that all new repayments are being met in full.

Loans and Advances are written off after they are classified as 'lost', that is, the asset is irrecoverable, or it is no longer considered economically viable to try and recover it or it is deemed immaterial, or full and final settlement is reached, including loan collateral that has been realised, and a shortfall remains. In the event of write off, the loan balance is removed from the statement of financial position and the impairment allowance held against this loan is released.

	Performing	Under- performing	Non- Performing	Total
	US\$'000	US\$'000	US\$'000	US\$'000
	(Stage 1)	(Stage 2)	(Stage 3)	
Opening loss allowance at 1 January 2021 (under IFRS 9)	591	1	9	601
Financial assets transferred:				
From Stage 1 to Stage 2	(19)	19	-	-
From Stage 2 to Stage 3	-	-	-	-
From Stage 1 to Stage 3	-	-	-	-
From Stage 3 to Stage 2	-	-	-	-
Loans repaid/written off	(194)	-	(9)	(203)
Decrease in ECL losses	(341)	-	-	(341)
New financial assets originated	72	-	-	72
Closing loss allowance at 31				
December 2021	109	20	-	129
Comprised of:				
Loans and cash deposits with banks	83	17	-	100
Loans and advances to customers	11	3		14
Financial assets measured at FVOCI	-	-	-	-
Trade related contingencies	15	-	-	15
Total by stage and asset class	109	20		129

(e) Use of estimates and judgement (continued)

At 31 December 2021, impairment allowance totalled US\$0.129m (2020: US\$0.601m). The net impairment movement (i.e. after recoveries) for loans and advances to customers recognised in 2021 was US\$(0.472m) (2020: US\$(17.38m).

The gross carrying amount of financial instruments, and thus the maximum exposure to loss is as follows:

	Financial Assets 2021 US\$'000
Performing	157,858
Under-performing	8,348
Non-performing	
Total gross financial assets	166,206
Less: Loan loss allowance	(114)
Less: Off balance sheet allowance	(15)
Financial assets net of ECL	166,077

3. Summary of significant accounting policies

(a) Interest income and expense

Interest income on financial assets that are classified at amortised cost or fair value through other comprehensive income and interest expense on financial liabilities are recognised in profit or loss using the effective interest rate method. The effective interest rate is the rate that exactly discounts the estimated future cash receipts and payments through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the gross balance on stage 1 and stage 2 assets.

The calculation of the effective interest rate includes all fees, transaction costs, and discounts or premiums that are an integral part of the effective interest rate. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

Interest on impaired financial assets is calculated by applying the original effective interest rate of the financial asset to the carrying amount as reduced by any allowance for impairment.

Interest income and expense presented in the profit and loss include interest on financial assets and liabilities held at amortised cost on an effective interest rate basis.

(b) Fees and commission

Fees and commission are accounted for depending on the services to which the income relates as follows:

- income earned on the execution of a significant act is recognised in 'fees and commission income' when the act is completed (for example, a fee arising from arranging a loan facility);or
- income earned from the provision of services is recognised in 'fees and commission income' as the services are provided (for example, charges made for servicing customer accounts and the provision of trade finance services); and income which forms an integral part of the effective interest rate (for example, certain loan commitment fees) of a financial instrument is recognised as an adjustment to the effective interest rate and recorded in 'Interest income'.

(c) Foreign currency

A foreign currency transaction is recorded in the functional currency by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of each reporting period, foreign currency monetary items are translated using the closing rate and resulting gains and losses on translation are included in the profit or loss.

Exchange gains on foreign exchange transactions with customers are recorded as income during the period.

(d) Financial instruments

Recognition

The Bank recognises financial assets and financial liabilities in its statement of financial position when it becomes a party to the contractual provisions of the instrument. The classification policy below relates to financial assets recorded in 2020 and 2021 are compliant with IFRS 9 and outlined in accordance with the policies in note 2.

Management classifies financial assets and liabilities into the following categories at the time of initial recognition:

- 'amortised cost'
- 'fair value through profit or loss'
- 'fair value through other comprehensive income'

Initial measurement

When a financial asset or financial liability is recognised initially, the Bank measures it at its fair value plus (in the case of a financial asset or financial liability not at fair value through the profit or loss) transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

3. Summary of significant accounting policies (continued)

Subsequent measurement

Financial assets initially classified at amortised cost are subsequently measured at amortised cost. Financial assets classified as 'hold to collect and sell' are subsequently measured at fair value through other comprehensive income. Financial liabilities are subsequently measured at amortised cost.

Measurement bases

(i) Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, less principal repayments to date, plus or minus the cumulative amortisation using the effective interest rate method, of any difference between the initial amount recognised and the maturity amount, less any reduction for impairment.

(ii) Fair value measurement

The determination of fair values of financial assets and financial liabilities quoted in an active market is based on observed bid and offer prices for assets and liabilities respectively. For all other financial instruments, fair value is determined by using valuation techniques. Valuation techniques include comparison to similar instruments for which market observable prices exist, discounting future cash flows, option pricing and other valuation models and methods widely used by market participants. As the Bank does not presently use more complex financial instruments, all the inputs to these valuation models and techniques are market-observable.

(e) Financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income comprise of financial assets which are classified on initial recognition as being held to collect for contractual inflows and for sale. Gains and losses arising from changes in fair value are recognised as they occur in other comprehensive income.

(f) Financial assets and liabilities at fair value through profit and loss

Financial assets and liabilities at fair value through the profit and loss comprise of derivatives recognised at fair value with transaction costs recognised in profit or loss. Gains and losses arising from changes in fair value are recognised as they occur in profit or loss.

(g) Equity and other financial liabilities

The Bank classifies financial instruments that it issues as an equity instrument or financial liability in accordance with the substance of the contractual terms of the instrument. An instrument is classified as equity if it evidences a residual interest in the assets of the Bank after deduction of liabilities. An instrument is classified as a liability if it represents a contractual obligation to deliver cash, or another financial asset or to exchange financial assets or financial liabilities on potentially unfavourable terms.

Other financial liabilities, not classified as fair value through profit and loss, are initially recognised at fair value, including directly attributable transaction costs and are subsequently measured at amortised cost, using the effective interest rate method.

Deposits and customer accounts are classified as liabilities. Customer accounts with no activity for two years are moved to dormant account status and are then held within other liabilities.

Letters of credit are given as security to support the performance of a customer to third parties. As the Bank will only be required to recognise the exposure of these obligations in the event of the Customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amounts. However, the bank assesses letter of credit according to IFRS9 principles and makes provisions accordingly.

3. Summary of significant accounting policies (continued)

(h) Impairment of financial assets

The Bank assesses impairment of financial assets on a forward-looking basis; the expected credit losses ('ECL') associated with its financial assets carried at amortised cost, FVOCI and other off-balance sheet commitments are recognised in profit or loss as they occur.

The Bank considers evidence of impairment at both a specific asset and collective level. All individually significant financial assets are assessed for specific impairment. Assets that are not individually significant are then collectively assessed for impairment by grouping together financial assets (carried at amortised cost) with similar credit risk characteristics, taking into account asset type, industry, geographic location, collateral type, past-due status, historical loss experience and other relevant factors.

When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

(i) Property and equipment

Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and impairment losses if any. Cost includes expenditures that are directly attributable to the acquisition of the asset.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

Subsequent costs

The cost of replacing part of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Bank and its cost can be measured reliably. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

Depreciation

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property and equipment. Leased assets are depreciated over the shorter of the lease term and their useful lives.

The estimated useful lives for the current and comparative periods are as follows:

Leasehold improvements - Remaining life of lease

Office equipment and furniture - 5 years
Computer hardware - 3 years
Motor vehicles - 4 years

Depreciation methods, useful lives and residual values are reassessed at the reporting date.

(j) Intangible assets - software

Software acquired by the Bank is stated at cost less accumulated amortisation and accumulated impairment losses. All costs have been capitalised in accordance with IAS 38.

Amortisation is recognised in profit or loss (within 'Depreciation and amortisation') on a straight-line basis over the estimated useful life of the software, which is assessed annually, from the date that it is available for use. The estimated useful life of software is three to five years.

3. Summary of significant accounting policies (continued)

(k) Impairment of non-financial assets

The carrying amounts of the Bank's non-financial assets, excluding any deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in profit or loss.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(1) Leases

The Bank has applied the modified retrospective adoption method of IFRS 16 so has recognised leases on balance sheet as at 1 January 2019. In addition, the Bank has measured right-of-use assets by reference to the measurement of the lease liability on that date. The Bank recognises interest on its lease liabilities and amortisation on its right-of-use assets.

The Bank has elected not to recognise right-of-use assets and lease liabilities for some leases of low value assets based on the value of the underlying asset when new or for short-term leases with a lease term of 12 months or less.

Payments made under operating leases out of scope from IFRS 16 are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

The lease liability has been measured at the present value of the remaining lease payments discounted at 4.46% which represents an estimate of the Bank's rate of borrowing, independently and under comparable conditions. The right-of-use asset is equal to the lease liability less any prepaid lease payments.

3. Summary of significant accounting policies (continued)

(m) Income tax

Income tax comprises current tax and deferred tax. Income tax is recognised in profit or loss except to the extent where underlying items are recognised directly through other comprehensive income or equity.

Current tax is the tax expected to be payable on the taxable profit for the year, calculated using tax rates enacted or substantively enacted by the reporting date, and any adjustment to tax payable in respect of previous years. Current tax assets and liabilities are offset when the Bank intends to settle on a net basis and the legal right to offset exists.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and the amounts attributed to such assets and liabilities for tax purposes. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated using the tax rates expected to apply in the periods in which the assets will be realised or the liabilities settled, based on tax rates and laws enacted, or substantively enacted, by the reporting date.

(n) Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents are deemed to comprise cash in hand, cash at other banks repayable on demand and treasury bills maturing within three months of the transaction date.

Cash and cash equivalents are carried at amortised cost in the statement of financial position.

(o) Pension costs

The Bank operates a defined contribution pension scheme and the amount charged to profit or loss in respect of pension costs and other post-retirement benefits is the contribution payable in the year. Differences between contributions payable in the year and contributions actually paid are shown as accruals or prepayments in the statement of financial position.

4. Segmental reporting

Segmental analysis of income has not been prepared as, in the opinion of the directors, all of the Bank's income derives from one main activity, commercial and retail banking, which is carried out in the United Kingdom.

5. Interest income

	2021 US\$'000	2020 US\$'000
Interest income on securities measured at FVOCI	26	391
Interest income on loans and advances	3,087	5,768
	3,113	6,159
6. Interest expense		
	2021 US\$'000	2020 US\$'000

Recognised over time	5	-	161	37	203
Total	975	164	204	42	1,385

8. Dealing and exchange gain

Dealing and exchange gains relates to foreign exchange income derived from customer facilitation, including transactions on behalf of the UBN, the revaluation of assets and liabilities denominated in currencies other than the US Dollar and the gain / (loss) from the sale of securities.

	2021	2020
	US\$'000	US\$'000
Foreign exchange gain	106	333
	106	333
9. Other operating expense		
• • •	2021	2020
	US\$'000	US\$'000
Other operating charges and brokerage	(335)	(341)
	(335)	(341)

10. Administrative expenses

	2021 US\$'000	2020 US\$'000
Wages and salaries, including directors	(4,863)	(4,844)
Social security costs	(513)	(572)
Pension costs	(550)	(453)
Other staff costs	(501)	(346)
Total staff costs	(6,427)	(6,215)
Other recurring administrative expenses	(3,069)	(2,907)
-	(9,496	(9,122)

Other administrative expenses are incurred in the ordinary course of the Bank's business and do not include any non-recurring items.

Average number of employees, including executive directors:	2021 No.	2020 No.
Banking	18	21
Operations	21	23
Administration	3	3_
	42	47

11. Pension costs

The Bank makes contributions to the personal pension funds of employees under Group Personal Pension arrangements. During the year to 31 December 2021, the Bank made contributions totalling US\$ 550,357 (2020: US\$ 452,632).

Contributions accrued at the reporting date amounted to US\$nil (2020: US\$nil). There were no outstanding pre-paid contributions at the reporting date.

12. Directors' emoluments

	2021	2020
	US\$'000	US\$'000
Executive director emoluments	(249)	(352)
Non-executive directors' fees	(314)	(292)
	(563)	(644)

The emoluments of the highest paid director, excluding pension contributions, were US\$248,851 (2020: US\$352,377). Pension contributions were made to one director during the year amounting to US\$25,999 (2020: US\$26,350). US\$nil of benefits in kind were paid during the year (2020: US\$nil).

13. Loss before tax		
	2021	2020
	US\$'000	US\$'000

Temporary differences not recognised in the computation	-
Tax credit 1	2

Tax recoverable of \$252,750 has been received in cash in 2022.

(c) Analysis of deferred tax assets / (liabilities)

The following is an analysis of the deferred tax assets recognised by the Bank:

	2021	2020
	US\$'000	US\$'000
Brought forward	-	-
Movements in respect of prior year	-	-
Deferred tax recognised directly to equity	-	-
Short term timing differences	-	-
		-
		- -

A deferred tax asset of US\$8,210,299 against losses and temporary differences of US\$32,841,195 has not been recognised.

(d) Factors that may affect future tax charges

The UK corporation tax rate is 19% for the current financial year. The UK corporation tax rate will increase to 25% for profits of over £250,000 from 1 April 2023.

${\bf NOTES\ TO\ THE\ FINANCIAL\ STATEMENTS\ (continued)}$

15. Financial assets and liabilities

The table below sets out the Bank's classification of each class of financial asset and liability as at 31^{st} December 2021 and 31^{st} December 2020:

2021 US\$'000	Note	Measured at FVOCI	Financial assets at amortised cost	Financial liabilities at amortised cost	Total
Cash at bank and in hand	16	-	8,999	-	8,999
Financial assets measured at FVOCI	17	30,284	-	-	30,284
Loans and advances to banks	18	-	110,627	-	110,627
Loans and advances to customers	19	-	16,168	-	16,168
Other assets	23	-	1,201		1,021
Deposits by banks	24	-	-	69,104	69,104
Customer accounts	25	-	-	57,304	57,304
Other liabilities	26/33	-	-	3,368	3,368
2020					
US\$'000	Note	Measured at FVOCI	Financial assets at amortised cost		Total
Cash at bank and in hand	16	-	7,703	-	7,703
Financial assets measured at FVOCI	17	26,371	-	-	26,371
Loans and advances to banks	18	-	234,368	-	234,368
Loans and advances to customers	19	-	13,735	-	13,735
Other assets	23	-	1,069		1,069
Deposits by banks	24	-	-	151,947	151,947
Customer accounts	25	-	-	84,306	84,306
Other liabilities	26/33	-	-	4,171	4,171

16. Cash at bank and in hand

	2021	2020
	US\$'000	US\$'000
Cash	-	109
Short term placements with other banks	9,000	7,607
Gross amount	9,000	7,716
Impairment under IFRS 9	(1)	(13)
Net amount	8,999	7,703
Cash is classified as a level 1 instrument.		
17. Financial assets measured at fair value		
	2021	2020
	US\$'000	US\$'000
Treasury bills	2,400	10,226
Multilateral development bank bonds	27,884	16,155
Gross amount	30,284	26,381
Impairment under IFRS 9		(10)
Net amount	30,284	26,371
Maturity		
- 3 months or less	7,602	6,552
- 1 year or less but over 3 months	22,682	12,219
- 5 years or less but over 1 year	-	7,600
- Over 5 years	<u> </u>	
· ·	30,284	26,371

The Bank measures fair values using the fair value hierarchy that reflects the significance of inputs used in making the measurements. The financial assets of the Bank fall within the category of Level 1 where valuation is based upon quoted prices in an active market for the same or identical instrument. Unrealised Loss of US\$3,212 (2020: Unrealised loss of US\$25,123) have been recognised in other comprehensive income. Financial assets measured at fair value through OCI purchased and sold amounted to US\$45,472,861 (2020: US\$ 15,775,324) and US\$41,564,664 (2020: US\$41,981,974) respectively.

18. Loans and advances to banks

The following table shows total bank loans

		2021			2020		
		US\$'000			US\$'000		
	Gross amount	Impairment Allowance	Net amount	Gross amount	Impairment Allowance	Net amount	
Bank loans	110,741	(114)	110,627	234,772	(404)	234,368	
	110,741	(114)	110,627	234,772	(404)	234,368	

The fair value of the cash collateral held in respect of the loans and advances to banks at 31 December 2021 is US\$6,615,648 (2020: US\$7,861,618). This collateral can be used in the event of default by the borrower.

The following table shows the remaining maturity of the loans and advances to banks:

		2021			2020	
		US\$'000			US\$'000	
	Gross Amount Performing	Impairment Allowance	Net Amount	Gross Amount	Impairment Allowance	Net amount
Repayable on demand or at short notice	1	-	1	1	-	1
Remaining maturity:						
- 3 months or less excluding above	94,789	(41)	94,748	224,740	(219)	224,521
- 1 year or less but over 3 months	7,034	(46)	6,988	-	-	-
- 5 years or less but over 1 year	8,917	(27)	8,890	10,031	(185)	9,846
	110,741	(114)	110,627	234,772	(404)	234,368

Amounts repayable on demand or at short notice include monies pledged to banks in respect of trade finance transactions of US\$970 (2020: US\$ 970).

19. Loans and advances to customers

	2021 2020						
		US\$'000			US\$'000		
	Gross amount	Impairment allowance	Net amount	Gross amount	Impairment allowance	Net amount	
Commercial loans & advances	14,597	(6)	14,591	9,468	(92)	9,376	
Personal loans & advances	116	-	116	169	-	169	
Syndicated loans	1,468	(7)	1,461	4,269	(79)	4,190	
	16,182	(14)	16,168	13,906	(171)	13,735	

The fair value of the collateral held in respect of the loans and advances to customers is US\$35,918,558 as at 31 December 2021 (2020: US\$26,893,376). This collateral can be used in the event of default by the borrower. Out of the total collateral, US\$nil is for impaired loans and advances to customers (2020: US\$7,158,466) and US\$5,278,721 (2020: US\$3,075,892) is for loans and advances to customers that are past due, but not impaired.

The following table shows the remaining maturity of the loans and advances to customers:

		2021			2020		
_		US\$'00	00	US\$'000			
_	Gross Amount	Impairment allowance	Net amount	Gross Amount	Impairment allowance	Net amount	
Repayable on demand or at short notice	6	-	6	2,434	(8)	2,426	
Remaining maturity:							
- 3 months or less excluding above	5,343	(2)	5,341	1	-	1	
- 1 year or less but over 3 months	3,190	(1)	3,189	16	-	16

The ordinary shares comprise a single class and each have the same voting rights as well as rights to dividends and distributions. The deferred shares carry no entitlement to vote or receive distributions.

29. Related party transactions

During the year, the Bank undertook transactions with Union Bank of Nigeria Plc and its subsidiaries (the UBN Group) in the normal course of business. These include loans and deposits and foreign currency transactions and the associated interest income and expenses. Loans and advances to banks are cash secured to a maximum of US\$7.5m (2020: US\$7.9m). Balances and related income and expense included in these financial statements in respect of the transactions with UBN Group are as follows:

	2021	2020
Holding company	US\$'000	US\$'000
Assets		
Cash at bank and in hand	-	0.4
Loans and advances to banks	6,721	9,792
Liabilities		
Deposits by banks	68,045	17,827
Income – interest		
From holding company	570	704
Expense - interest		
To holding company	(3)	38

At 31 December 2021 no loans were made (2020: one) to executive directors of the Bank, on terms generally available to staff, remained outstanding to the amount of US\$nil against which an ECL provision of US\$nil was made. (2020: US\$9,502, ECL provision US\$11). This balance is included within note 19. More information regarding key management compensation is included within note 12. Also outstanding were loans totalling US\$438,030, against which an ECL provision of \$395 was made, (2020: US\$494,847, ECL provision US\$496) to the relative of a member of the Board. These loans consisted of a buy to let mortgage of US\$431,982 and an overdraft facility of US\$6,048. These were granted at commercial terms and at market rates.

30. Financial risk management

(a) Risk management

The Bank holds and issues financial instruments for the purposes of:

- earning interest margins, fees and commission;
- financing its operations; and
- managing the interest rate and currency risks inherent in its operations.

The Bank does not actively trade in financial instruments and, therefore, does not have a trading book. Its operations are financed from a mixture of equity and deposits. Deposits are raised primarily in US Dollars and to a lesser extent Sterling and euros at both fixed and variable rates and lending is similarly distributed. Longer term lending is partly financed by capital but is otherwise generally matched to deposits both in terms of maturity and re-pricing.

The Bank's functional currency is the US Dollar. It does not actively speculate in foreign currencies and the majority of its foreign exchange transactions are carried out in the spot market for customer facilitation purposes. The main risks arising from the Bank's financial instruments are credit risk, liquidity risk, interest rate risk and foreign currency risk. Management has developed policies for managing each of these risks, which are reviewed and approved by the Board on an annual basis. Significant features of these policies are summarised below.

30. Financial risk management (continued)

(b) Credit risk

Credit risk is the risk that a customer or counterparty is unable or unwilling to meet a commitment that it has entered into with the Bank and arises mainly from lending and trade finance activities. To mitigate this risk, the Bank has adopted policies that minimise significant unsecured credit exposures other than to financial institutions and to avoid concentrations of unsecured credit risk to counterparty groups, industry sectors and countries, which do not carry investment grade credit ratings. All credit exposures are subject to continuous assessment by the Assets & Liabilities Committee and the Risk & Board Risk Committee. It is the policy of the Bank to make adequate impairment allowances where real or probable problems in asset recovery are identified and to make adequate collective impairment allowances for those as yet unidentified credit problems that are inherent in any portfolio of banking assets. Details of impairment allowances are summarised in notes 16 to 20.

(i) Credit exposure by sector		
	2021	2020
	US\$'000	US\$'000
Banks	127,228	242,071
Government	22,682	26,371
Corporate	12,365	9,460
Individuals	3,802	4,275
	166,077	282,177
(ii) Credit exposure by location		
	2021	2020
	US\$'000	US\$'000
Europe	107,290	225,070
Africa	31,198	33,465
United States	27,589	18,588
Others	-	5,054
	166,077	282,177

The above sector and geographical analyses only include cash at bank and in hand, loans and advances to banks and to customers at amortised cost, financial assets valued at fair value through other comprehensive income and financial assets - derivatives. The Bank has established procedures to manage country risk. During the year there continued to be periods of significant volatility in the emerging bond markets which are closely monitored and valued daily. The Bank also carries out country credit reviews of emerging markets and thereby assesses any potential creditworthiness issues.

30. Financial risk management (continued)

(iii) Credit exposure by Credit Quality Step

The Bank extends credit facilities to quality rated and unrated counterparties. An analysis of the credit quality of the maximum credit exposure based on ratings provided by Fitch rating agency and where applicable grouped by Credit Quality Steps (CQS) as follows:

		2021	2020

5	Related B+ to B-	<u></u>	
		30,284	26,371

30. Financial risk management (continued)

As at 31 December 2021, the Bank's maximum exposure to credit is US\$183m (2020: US\$290m), of which US\$ nil (2020: US\$2,418,630) was deemed to be impaired or doubtful. These amounts include all financial assets and undrawn irrevocable loan and trade commitments. The Bank held collateral totalling US\$69m (2020: US\$51m) against credit exposures of US\$166m (2020: US\$283m) of which US\$23.1m (2020: US\$14.2m) was in the form of cash. The remaining collateral was primarily in the form of government guarantees, immovable property and charges over companies' assets. Total trade related exposure included above was US\$46.2m (2020: US\$34.7m) against which the Bank held cash collateral of US\$23.1m (2020: US\$14.2m) included above.

Loans are considered forborne when terms and conditions of a loan are modified due a borrower being unable to meet current terms and conditions due to factors indicating financial difficulty. Examples may include reducing interest rates, delaying payment of principal and amending or not enforcing covenants.

Lending subject to forbearance, net of credit risk mitigation, as at 31 December 2021 is US\$nil (2020: US\$nil).

(c) Liquidity risk

Liquidity risk is the risk that the Bank is not able to meet its commitments to customers and counterparties as they fall due as a result of mismatch in cash flows arising from liabilities and assets. To mitigate this risk, the liquidity structure of assets, liabilities and commitments is managed so that resultant cash flows are appropriately balanced, within approved limits and mismatch parameters set by the PRA, to ensure that all obligations can be met when due. Generally, it is the policy of the Bank to match the currency and maturity of all liabilities and assets as far as practicable and to maintain a store of liquidity in the form of readily realisable debt securities, including government treasury bills.

The following table sets out the contractual maturities (representing undiscounted contractual cash-flows) of financial liabilities. All amounts within deposits by banks and customer accounts include both principal and future interest payments:

2021								
US\$'000			Time band			Total		
	Less than 3 Months	3-6 months	6 – 12 months	1 – 5 years	Over 5 years			
Liabilities								
Deposits by banks	69,105	-	-	-	-	69,105

Total liabilities	208,509	28,102	2,853	666		240,130

30. Financial risk management (continued)

(d) Interest rate risk

Interest rate risk is the risk of loss arising from differences in the re-pricing dates of liabilities and assets. The Bank's policy is to limit re-pricing risk by setting re-pricing gap limits and by regularly reviewing its re-pricing risk by reference to assumed adverse movements in interest rates to ensure that the risk of loss remains within acceptable limits. Therefore, the Bank's treasury and lending functions seek to price assets at floating rates or at fixed rates for fixed periods at appropriate roll-over dates that allow for matching with customer and market liabilities.

The table below summarises the Bank's assets and liabilities by re-pricing time band and demonstrates the extent to which these are matched.

(i) Interest rate gap analysis

Assets and liabilities are analysed in time bands according to the earlier of the period to the next interest rate repricing and maturity date as follows:

			2021				
US\$'000			Time ba	ınd			Total
•	Less than 3 Months	3 – 6 months	6 – 12 months	1 – 5 years	Over 5 years	Non- interest bearing	
Total Financial assets	119,393	30,157	7	13,494	3,026	-	166,077
Total Financial liabilities	104,984	18,309	3,774	2,167	670	-	129,904
Interest rate sensitivity gap	14,409	11,848	(3,767)	11,327	2,356	-	36,173
Cumulative gap	14,409	26,257	22,490	33,817	36,173	-	-

			2020				
US\$'000	Time band						Total
	Less than 3 Months	3 – 6 months	6 – 12 months	1 – 5 years	Over 5 years	Non- interest bearing

Total Financial liabilities	204,631	28,102	2,853	666	-	-	236,252
Interest rate sensitivity gap	36,572	(19,376)	656	24,830	3,243	-	45,925
Cumulative gap	36,572	17,196	17,852	42,682	45,925		

30. Financial risk management (continued)

(ii) Interest rate sensitivity analysis

Interest rate sensitivity analysis has been performed on the net cash flow interest rate risk exposures as at the reporting dates. A range of possible upward/downward movements in Libor/Euribor of 100bps has been assumed for the different currencies which the directors consider reasonable given the current market conditions and the nature of matched funding within the exposures. If all other variables are held constant, the tables below present the likely impact on the Bank's statement of comprehensive income:

(iii) Risk arising from LIBOR transition

Following the cessation of LIBOR the Bank is predominantly entering into new trades at fixed interest rates with the inclusion of re-pricing clauses for longer-term deals, whilst the market settles on a new standard of variable pricing. Whilst this increases interest rate risk overall, this is only at the short end of the curve, minimising any impact.

(e) Currency risk

Limited foreign exchange exposure arises from the facilitation of customer orders and from profits and losses in currencies other than the functional currency. The Bank does not actively speculate in foreign currencies and does not deal in forward foreign exchange, foreign exchange options, futures or options thereon except to the limited extent necessary to hedge cash flows arising from its own and its customers' activities. Foreign exchange exposures are subject to limits as to positions in individual currencies and as to the 'overall net open position'.

Details of the Bank's assets and liabilities by currency of denomination are summarised in US Dollars in table (i) below so as to demonstrate the extent to which foreign currency exposures are matched.

(i) Net currency position analysis

Assets and liabilities, expressed in US\$ but analysed according to the currency in which they were denominated, after taking into account the accounting policy for foreign currencies as set out in note 3(c), were as follows:

			2021		
US\$'000			Currencies		Total
Total Financial assets Total Financial liabilities	US Dollar 124,341 (86,689)	£ Sterling 38,160 (39,737)	Euro 3,280 (3,310)	Other 296 (169)	166,077 (129,905)

Currency position	46,105	(222)	29	13	45,925

30. Financial risk management (continued)

(ii) Foreign currency sensitivity analysis

Foreign currency sensitivity analysis has been performed on the foreign currency exposures inherent in the Bank's financial assets and financial liabilities at the reporting dates. The sensitivity analysis provides an indication of the impact on the Bank's statement of comprehensive income of reasonably possible changes in the currency exposures embedded within the functional currency environment in which the Bank operates. Reasonably possible changes are based on an analysis of historical currency volatility, together with any relevant assumptions regarding near-term future volatility.

The Bank believes that for each foreign currency net exposure it is reasonable to assume a 5% appreciation/depreciation against the Bank's functional currency, given the control exercised over the Bank's currency positions. If all other variables are held constant, the tables below present the impacts on the Bank's statement of comprehensive income if these currency movements had occurred.

The financial statements have used a closing rate of £1 to \$1.35 and during the year the average rate for £1 was \$1.38.

2021

US\$'000	Currencies (FC)		
•	£ Sterling	Euro	Other
Net foreign currency exposures	1,921	(30)	127
Impact on profit and equity of 5% increase in FC:USD rate	(68)	1	2,226
Impact on profit and equity of 5% decrease in FC:USD rate	75	(1)	(2,226)

Nigerian Naira, at a year-end rate of 424.25/USD represents 83% of the 'Other' column resulting in the large impact shown in currency.

Impact on profit and equity of 5% increase in FC:USD rate	8	(1)	14	
Impact on profit and equity of 5% decrease in FC:USD rate	(9)	1	(14)	

30. Financial risk management (continued)

(f) Capital adequacy

The Bank is subject to minimum capital requirements imposed by the PRA, following guidelines developed by the Basel Committee on Banking Supervision and implemented in the UK via European Union Directives. The revised framework, known as CRDIV, includes a more risk-sensitive methodology for the calculation of capital requirements for Credit Risk as well as a capital requirement for Operational Risk.

Minimum capital requirements under the PRA's rules are calculated by summing the capital requirements for Credit Risk, Operational Risk, Market Risk and Counterparty Credit Risk. For the purposes of computing these requirements the Bank has elected to adopt the Standardised Approach to Credit Risk and the Basic Indicator Approach to Operational Risk. Market Risk is determined using the standard Position Risk Requirement ('PRR') rules and Counterparty Credit Risk ('CCR') is calculated using the CCR mark to market method. The Market Risk and Counterparty Credit Risk components of the capital requirement are small because the Bank has no trading book.

The minimum capital requirement for Credit Risk under Pillar 1 of CRDIV is calculated by multiplying risk weighted assets by 8%, the internationally agreed minimum ratio. Risk weighted assets are determined by applying risk weights, which vary according to the credit rating of the obligor, to the Bank's assets, including off statement of financial position engagements that are subject also to given credit risk conversion factors. Under Pillar 2 the Bank undertakes an assessment (the ICAAP process) of the amount of capital that is required to support its activities using the Pillar 1 plus approach. This assessment has identified a number of risks that either do not attract capital under Pillar 1 or where the Pillar 1 requirement does not fully capture the risks faced by the Bank. Additional capital is set aside under Pillar 2 for these risks, which include exposure concentrations and interest rate risk in the non-trading book. The Bank's total capital requirement is then the sum of the amounts calculated under Pillar 1 and Pillar 2. Furthermore, the Bank is subject to Individual Capital Guidance ('ICG') provided by the PRA whereby the Pillar 2 requirement is computed by applying a formula to the Pillar 1 requirement. This results in a Pillar 2 requirement that is somewhat higher than that determined through the ICAAP process.

The Bank calculates its capital adequacy on a daily basis by comparing the total capital requirement in accordance with the ICG to capital available to meet this requirement (Regulatory Capital). A capital buffer is also incorporated, which is based on a level of tolerance to unexpected losses that is considered and agreed by the Board as part of the ICAAP process. At 31 December 2021 and throughout the year, the Bank maintained Regulatory Capital in excess of the total capital requirement calculated in accordance with the ICG.

The following table is an analysis of those items which comprise the Regulatory Capital base for the purposes of reporting to the PRA.

	2021	2020
	US\$'000	US\$'000
Statement of financial position:		
Share Capital	60,090	60,090
Profit & Loss Reserve	(19,184)	(13,220)
Securities (FVOCI reserve)	(7)	(4)
Less Intangibles	(245)	(375)
IFRS 9 transitional adjustments	66	92
Total Tier 1 Capital	40,720	46,583
Total Regulatory Capital	40,720	46,583

30. Financial risk management (continued)

(f) Capital adequacy (continued)

The Regulatory Capital shown above differs from that reported to the PRA because retained profits cannot be included until such time as the Financial Statements for the relevant period have been audited and approved.

The directors regard share capital and reserves as its capital for the capital management purposes where the objective to ensure it is sufficient to participate in lines of business and to meet Prudential Regulatory Authority's capital requirements. In order to maintain or adjust the capital structure, the Bank may issue new shares or sell assets.

(g) Lending commitments	2021	2020
	US\$'000	US\$'000
Undrawn formal standby facilities, credit lines and other commitments to lend:	1,434	-
Contract amount	-	-
Credit equivalent amount	-	-
Risk weighted amount		

31. Fair values of financial instruments

Fair value measurements

The information set out below provides information about how the Bank determines fair values of various financial assets and financial liabilities. The Bank measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

Level 1 – fair value measurements derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – fair value measurements derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 – fair value measurements derived from unobservable inputs to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability.

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

US\$'000	2021				
	Level 1	Level 2	Level 3	Total	
Financial assets measured at FVOCI	30,284	-	-	30,284	
Financial assets - derivatives	-	-	-	-	
Financial liabilities - derivatives	<u> </u>	-	-	-	
Total	30,284	-	-	30,284	
	-				
US\$'000		2020			
	Level 1	Level 2	Level 3	Total	
Financial assets measured at FVOCI	26,371	-	-	26,371	
Financial assets - derivatives	-	-	-	-	
Financial liabilities - derivatives		-	-	_	
Total	26,371	-	-	26,371	

31. Fair values of financial instruments (continued)

The following table sets out the fair values of financial instruments not measured at fair value and compares them to carrying value.

	2021		2020	0
	Carrying Value	Fair Value	Carrying Value	Fair Value
	US\$'000	US\$'000	US\$'000	US\$'000
Assets				
Cash at bank	8,999	8,999	7,703	7,703
Loans and advances to banks	110,627	110,627	234,368	234,368
Loans and advances to customers	16,168	16,242	13,735	13,864
Other assets	1,090	1,090	1,137	1,137
Liabilities				
Deposits by banks	69,102	69,102	151,947	151,947
Customer accounts	57,304	57,314	84,306	84,315
Other liabilities	3,368	3,368	3,877	3,877

The fair value of financial instruments is the estimated price at which an orderly transaction to sell the asset or to transfer the liability would take place between market participants at the measurement date under current market conditions. If a quoted market price is available for an instrument, the fair value is calculated based on the market price. Where quoted market prices are not available, fair value is determined using pricing models which use a mathematical methodology based on accepted financial theories, depending on the product type and its components.

Cash at bank consists of demand deposits with third party banks. Accordingly, the carrying amount of these balances is deemed an appropriate approximation of the fair value.

Both loans and advances to banks and customers noted above are level 3 financial assets. Loans and advances to banks comprise secured loans, short-term placements with banks including collateral and unsettled financial transactions. The secured loans have been valued as above and using the valuation technique described below. The carrying amount of the other items is deemed a reasonable approximation of their fair value, as the transactions are very short-term in duration. This includes intercompany balances.

The fair valuation of loans and advances to customers is an area of considerable estimation and uncertainty as there is no observable market and values are significantly affected by customer behaviour. These comprise secured loans, unsecured loans and corporate loans.

The fair values of mortgage portfolios have been estimated by comparing existing contractual interest rates over the weighted average lives with an estimation of new business interest rates based on competitor market information. Adjustments have also been made to reduce:

- the weighted average lives to reflect the uncertainty inherent in the value that could be achieved, given that the borrower could re-finance at any time;
- discount the value of performing loans with a higher loan-to-value ratio to reflect the higher risk of this part of the portfolio and the fact that this is outside the Company's normal underwriting standards; and
- discount the collateral value of non-performing loans with a higher loan-to-value ratio to reflect the significantly higher possibility of re-possession and the lower value that is achieved on repossession and to take cognisance of rates available in the market for loans in arrears but with a lower loan-to-value ratio.

Unsecured loans are overdrafts and personal loans. The weighted average lives of these portfolios are short, and the business was written relatively recently. As a result, contractual interest rates approximate new business interest rates, and therefore no mark-to-market surplus or deficit has been recorded with respect to the performing book and discounts applied to the non-performing book.

31. Fair values of financial instruments (continued)

The fair values of corporate loans have been estimated by comparing existing margins with an estimation of new business rates for similar loans in terms of the borrower's segment, maturity and structure. Provisions are considered appropriate for the book that is not impaired. A discount has been applied to impaired loans as although exits have generally been achieved at carrying value, this does not reflect the discount a purchaser would require.

All financial liabilities are level 3 liabilities. The majority of deposit by banks, customer accounts and other liabilities are payable on demand and therefore can be deemed short-term in nature with the fair value equal to the carrying value. Certain of the customer accounts are at a fixed rate until maturity. The deficit/surplus of fair value over carrying value of these liabilities has been estimated by reference to the market rates available at the reporting date for similar customer accounts of similar maturities. The fair value of such customer accounts has been estimated using the valuation technique described below.

In the valuation of loans and advances and deposits, the 'present value' method is used. Expected future cash flows are discounted using the interest rate curves of the applicable currencies. The interest rates curves are generally observable market data and reference yield curves derived from quoted interest rates in appropriate time bandings, which match the timings of the cash flows and maturities of the instruments.

32. Contingent liabilities and commitments

Contingent liabilities

	2021 US\$'000	2020 US\$'000
Letters of credit	16,184	7,178
Guarantees given to third parties	348	314
	16,532	7,492

33. Leases

Low value leases

The Company had total minimum lease payments in respect of low value leases for land and buildings and equipment used in the business as follows.

Leases which expire:	2021 US\$'000	2020 US\$'000
Within one year	7	35
Within two to five years	-	-
Over five years	<u></u> _	
	7	35

33. Leases (continued)

Right-of-use-assets

Right-of-use-ussets		
	Land and	Land and
	Buildings	Buildings
	US\$'000	US\$'000
	2021	2020
At 1 January	3,019	3,294
Depreciation charge for the year	(392)	(403)
Foreign exchange movements	(197)	128
At 31 December	2,430	3,019
Lease liabilities		
	Land and Buildings	Land and Buildings
	US\$'000	US\$'000
	2021	2020
At 1 January	3,170	3,439
Interest expense	132	148
Lease payments	(529)	(536)
Foreign exchange movements	(45)	119
At 31 December	2,728	3,170
	2021	2020
Lease liabilities which expire:	US\$'000	US\$'000
Within one year	529	535
Within two to five years	1,927	1,930
Over five years	691	1,260
	3,147	3,725

These lease liabilities relate to the rental lease for the Bank's office premises at 1 King's Arms Yard, London, EC2R 7AF. In 2018 the Bank entered into a 10-year lease agreement for its office premises with a fixed rental term agreed for the first 5 years. The Bank has agreed to a known minimum increase at the end of the fixed term rental period and this has been factored into the lease calculations. These calculations are subject to amendment if any future rent increase is above the known minimum amount.

34. Dividends

A dividend payment of US\$nil was made during the year ended 31 December 2021 in respect of the year ended 31 December 2020 (made during the year ended 31 December 2020 in respect of the year ended 31 December 2019: US\$nil).

35. Ultimate parent company and controlling party

The Bank is a directly wholly owned subsidiary of its parent and ultimate holding undertaking, Union Bank of Nigeria Plc, a company incorporated in Nigeria and listed on the Nigerian Stock Exchange. The smallest and largest group in which the Bank is consolidated is Union Bank of Nigeria Plc.

Copies of the Group financial statements of Union Bank of Nigeria Plc can be obtained from: Corporate Affairs Department Union Bank of Nigeria Plc Stallion Plaza 36, Marina, Lagos Nigeria

36. Subsequent events

The directors do not propose a dividend in respect of the year ended 31 December 2021 (2020: US\$nil)

OTHER DISCLOSURES

The Capital Requirements (Country-by-Country Reporting) Regulations 2013 (SI 2013 No. 3118) implements part of the European Union's Capital Requirements Directive ("CRDIV"). Credit institutions and investment firms must disclose certain information on a consolidated basis for each country in which the firm has a subsidiary or branch.

Union Bank UK plc is a bank, and this disclosure meets its Country-by-Country Reporting ("CBCR") obligations under the Regulations. The information contained in this document reflects the position as at 31 December 2021.

Union Bank UK is required to disclose the following information:

Country (by turnover size)	Turnover (\$m)	Employees*	(Loss) before tax (\$m)	Corporation tax paid (\$m)	Public subsidies received (\$m)
United Kingdom	3.95	42	(5.97)	0.00	Nil
Consolidation adjustments Group Total	3.95	42	(5.97)	0.00	- Nil
